Correction of: <https://www.researchprotocols.org/2025/1/e76009/>

(*JMIR Res Protoc* 2025;14:e83537) doi: [10.2196/83537](https://doi.org/10.2196/83537)

In “Factors Affecting the Receptiveness of Chinese Internists and Surgeons Toward Artificial Intelligence–Driven Drug Prescription: Protocol for a Systematic Survey Study” (*JMIR Res Protoc* 2025;14:e76009) the authors noted one error.

In [Textbox 1](#), under both forced-choice questions, the first option:

≤ 1 to 3

Has been revised to:

≤ 1

And the following option has been added underneath the first option:

1.1 to 3

So that [Textbox 1](#) now reads as follows:

Textbox 1. Forced-choice questions in the survey questionnaire.

I anticipate ≥ 1 physician (possibly, including myself) at my hospital will become ready to use AI to prescribe a drug within ____ years.

- ≤ 1
- 1.1 to 3
- 3.1 to 5
- 5.1 to 10
- >10
- Never

I anticipate I myself will become ready to use AI to prescribe a drug within ____ years.

- ≤ 1
- 1.1 to 3
- 3.1 to 5
- 5.1 to 10
- >10
- Never

The correction will appear in the online version of the paper on the JMIR Publications website together with the publication of this correction notice. Because this was made after submission

to PubMed, PubMed Central, and other full-text repositories, the corrected article has also been resubmitted to those repositories.

This is a non-peer-reviewed article. Submitted 04.09.25; accepted 04.09.25; published 10.09.25.
