

Checklist for Participation in the Study

Check out if you or your relatives meet the requirements for participation in the Food-and-Cancer-Study!

(All answers have to be made referring to the patient and not referring to the person who collects data.)

Inclusion Criteria

- 1. There is a history of cancer disease. yes no
- 2. Therapies and / or follow-up examinations are done regularly. yes no
- 3. Age is 18 years or more. yes no
- 4. There is willingness to submit 3 extensive data surveys during the study. yes no
- 5. There is willingness to report changes (e.g. in nutrition habits) during the study (also online). yes no

Exclusion Criteria

- 1. The patient is currently pregnant. yes no
- 2. The patient is breast feeding at the moment. yes no
- 3. Psychiatric treatment was required during the last three months.* yes no
- 4. My Body Mass Index (BMI) is below 18,5 kg/m² (see below). yes no
- 5. There are great difficulties with eating (difficulties swallowing, loss of appetit,...) leading to reduced food intake. yes no
- 6. Participation in another study which requires adherence to certain nutrition rules. yes no

*) A "psychiatric" treatment is not a "psychological" or "psychotherapeutic" intervention. An example of a psychiatric disorder is e.g. schizophrenia, expamples of psychological conditions ar burn out or depressive mood. These later do not exclude you from participation.
